ICON SERVICES & TRADE LLC

TRADING | CONTRACTING | MANUFACTURING

Who We Are

At Icon Services & Trade LLC (PETROCON), we are more than just a supplier & service provider — we are strategic partners in progress. We specialize in delivering premium solutions and high-performance materials across key industrial sectors. With a solid foundation and a diversified portfolio, we have evolved into one of the most adaptable and reliable suppliers and service providers in the region.

Recognized for our adaptability and execution strength, PETROCON has earned the reputation of a trusted partner in enabling seamless project implementation and long-term value across the Middle East and beyond. Our approach is anchored in quality assurance, operational efficiency, and a relentless pursuit of engineering excellence.

Our Vision

Driven by a vision to be the preferred partner in providing exemplary materials and executing seamless projects, we continually strive for excellence and innovation. We envision contributing significantly to the advancement of industries we serve while upholding the highest standards of integrity and environmental responsibility.

Our Mission

Driven by a mission to forge enduring partnerships, we uphold the highest standards of innovation, technical precision, and on-time delivery — positioning PETROCON as the go-to partner for complex, high-impact projects.

Our Approach

At PETROCON, customer satisfaction is at the core of everything we do. We prioritize understanding the unique requirements of each project and client, offering personalized solutions that exceed expectations. With a focus on quality assurance, timely delivery, and cost-effectiveness, we aim to forge lasting partnerships based on trust and reliability.

Our Ethics

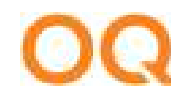

At PETROCON, our foundation is built on a strong ethical framework that guides every decision and interaction. We are committed to:

Integrity – We act with honesty, transparency, and accountability in all that we do.

Industry Overview

- ✓ Oil & Gas
- ✓ Construction & MEP
- ✓ Water & Waste Management
- ✓ Petrochemicals
- ✓ System Integration
- ✓ Agricultural & Food Technology
- ✓ Infrastructure
- ✓ Telecom & Electrical
- ✓ Green Energy & Eco-friendly solutions

OUR CLIENTS

SYSTEM INTEGRATION SERVICES

WELCOME TO THE FUTURE OF SMART LIVING

EXPERIENCE SEAMLESS CONTROL WITH HOME AUTOMATION

We Offer a premium smart home automation system that connects and automates lighting, security, entertainment, climate, and more — into one intuitive platform.

KEY FEATURES

- **Unified Control:** Control everything—TV, music, lights, locks, and shades—from one app or touchscreen.
- **Enhanced Security:** Monitor cameras, receive alerts, and control locks remotely.
- **Smart Lighting:** Set moods, automate routines, and save energy.
- **Whole-Home Audio/Video:** Stream music and video in every room, perfectly synchronized.
- **Intelligent Climate Control:** Automate thermostats and blinds for comfort and savings.
- **Voice Integration:** Works with Alexa, Google Assistant, and Siri

WHY CHOOSE CONTROL4?

- Professionally Installed
- Scalable from One Room to Full Estate
- Remote Access & Monitoring
- Beautiful, Customizable Interfaces

PERFECT FOR:

- Homeowners
- Developers & Builders
- Hotels & Hospitality
- Vacation Rentals
- Hotels & Hospitality
- Vacation Rentals

SYSTEM INTEGRATION SERVICES

At Icon Services and Trade LLC, we specialize in delivering end-to-end ELV (Extra Low Voltage) System, Home automation system, Integration Services for commercial, industrial, and critical infrastructure environments. From concept to commissioning, our expertise ensures intelligent, secure, and seamless technology integration across your building or facility.

OUR CORE SERVICES INCLUDE:

DATACENTER DESIGN, CONSULTANCY & IMPLEMENTATION

- Turnkey solutions for modern, scalable, and secure data centers
- Power, cooling, and redundancy planning

STRUCTURED CABLING & IT INFRASTRUCTURE

- Design and deployment of robust copper and fiber cabling networks
- Backbone infrastructure for voice, data & video systems

ACCESS CONTROL SYSTEMS

- Biometric, card-based, and mobile credential solutions
- Visitor management, time attendance, and integration with HR systems
- Tailored to enterprise, hospitality, healthcare, and industrial facilities

VIDEO CONFERENCING & COLLABORATION

- End-to-end collaboration systems for boardrooms, meeting spaces, and remote work
- Acoustic and visual optimization for effective communication

WIRELESS INFRASTRUCTURE

- Enterprise-grade Wi-Fi deployment
- Indoor/outdoor wireless mesh & mobility solutions
- Site surveys and spectrum analysis for optimal coverage

BUILDING MANAGEMENT & AUTOMATION

- Intelligent systems for HVAC, lighting, energy management
- Seamless integration with security, safety, and IoT devices
- Enhancing sustainability and operational efficiency

CCTV & SURVEILLANCE (INCLUDING THERMAL IMAGING)

- Advanced IP surveillance systems with analytics
- Thermal cameras for perimeter and low-light environments
- Remote monitoring and centralized video management

ADHESIVE TAPES & THERMAL INSULATION SOLUTIONS

- RELIABLE BONDING
- EFFICIENT INSULATION
- LONG-LASTING PROTECTION

At Icon Services and Trade LLC, we provide advanced adhesive and insulation solutions designed for construction, industrial, HVAC, and packaging applications. Our products ensure durability, weather resistance, and performance in the most demanding environments.

ADHESIVE TAPES

- General Purpose, Masking, Duct, Double-Sided, Aluminum Foil & BOPP
- High bonding strength and temperature resistance
- Ideal for sealing, packaging, and surface protection

ADHESIVE TAPES – JUMBO ROLLS

- For large-scale converting and industrial slitting operations
- Custom widths and thicknesses available
- Consistent adhesive coating and superior tack

THERMAL INSULATION MATERIALS

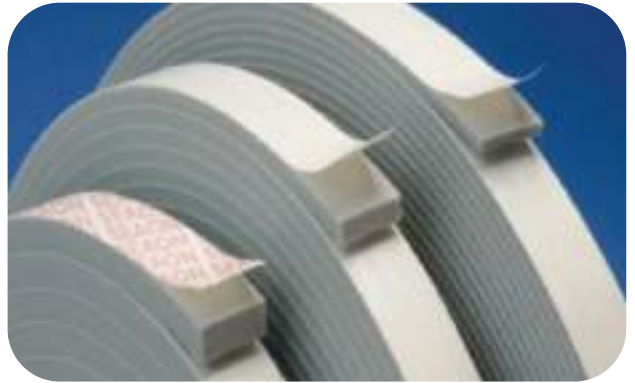

- Foam sheets, rolls, and pipe sections
- Designed for HVAC, refrigeration & duct insulation
- Reduces energy consumption and thermal transfer

U.V BARRIER FILMS & WRAPS

- UV-resistant polyethylene films and wraps
- Provides long-term protection for exposed surfaces
- Ideal for outdoor wrapping, construction & scaffolding coverage

WARNING TAPE

- Underground Detectable & Non-Detectable Tape
- Used to mark and identify buried utilities such as gas, water, electric, telecom, and fiber optic lines
- Brightly colored with bold warnings printed in multiple languages
Options available with detectable metal foil for easy tracing
- UV-stabilized and weather-resistant for long-lasting performance
- Standard widths: 50mm – 150mm | Custom widths available

DUCTILE IRON PRODUCTS

Comprehensive Solutions for Water & Infrastructure Networks

Icon Services and Trade LLC proudly supplies high-performance Ductile Iron (DI) Pipes, Fittings, and Manhole Covers engineered to meet demanding international standards and customized project requirements.

DUCTILE IRON PIPES

Sizes: DN 80 mm to DN 2800 mm

Joint Types: Socket-Spigot, Restrained Joint, Flanged Pipes

K-Class Options: K7, K9, K10, K12

Pressure Ratings: PN10, PN16, PN25, PN40, PN65

Coatings:

- Zinc + Bitumen (ISO 8179 compliant)
- Epoxy, PU, FBE, Rilsan
- Custom coatings as per client specification

DUCTILE IRON FITTINGS & FLANGED PIPES

DI Fittings: Bends, Tees, Reducers, Flanged Adaptors, Couplings

- Manufactured as per **ISO 2531:2009**
- Full range of accessories and configurations
- Available from DN 50 mm to DN 2800 mm
- Designed for water, sewage & industrial pipelines

MANHOLE COVERS

DI Fittings: Bends, Tees, Reducers, Flanged Adaptors, Couplings

Sizes: 300 mm to 1200 mm

Materials:

- Cast Iron (GG 20, GG 25)
- Ductile Iron (GGG 50)
- FRP

Surface Coatings:

- Black Bitumen
- Epoxy
- Client-specified finishes

Applications: Water Transmission | Sewerage Networks

Stormwater Drainage | Utility Chambers | Infrastructure Projects

OIL FIELD DRILLING SOLUTION

Premium Quality Pipes & Accessories for Demanding Drilling Operations

We specialize in supplying high-performance oil drilling equipment designed to meet the rigorous standards of onshore and offshore drilling operations.

OIL DRILL PIPE

High-strength seamless steel pipes used for rotary drilling. Built for durability and precision, ensuring smooth torque transmission and fluid circulation deep into the wellbore.

HEAVY WEIGHT DRILL PIPE (HWDP)

Bridging the gap between drill collars and standard drill pipe, HWDP provides added weight on bit while maintaining flexibility. Ideal for directional drilling and challenging formations.

DRILL COLLAR

Thick-walled, heavyweight tubulars that add necessary weight to the drill string. Offers stability, control, and minimizes vibrations during drilling operations.

FEATURES:

- Manufactured to API 5DP / API Spec 7-1 standards
- Premium-grade steel for high tensile strength and fatigue resistance
- Available in various sizes, grades, and connection types (API, tool joints, etc.)

APPLICATIONS:

Oil & Gas Exploration | Deep Well Drilling | Directional Drilling
High-Pressure Zones

Reliable Supply. Superior Performance. Trusted Partner.

BIOSWIM DEPURATOR

Let's say Goodbye to Chlorinated Swimming Pools through Bioswim Depurator Powered by Actox Patented Technology

With Bioswim, you can enjoy a cleaner, healthier pool without harsh chemicals.

ENJOY CLEAN, HEALTHY, AND SUSTAINABLE POOL CARE.

DIVE INTO A HEALTHIER, CLEANER POOL EXPERIENCE TODAY!

Bioswim Depurator offers an affordable solution by reducing chemical costs and minimizing long-term maintenance expenses of the swimming pool. It is user-friendly with quick installation and requires minimal upkeep, making it hassle-free to use.

The system is gentle on skin and eyes, eliminating irritation for a more comfortable swimming experience. Additionally, it protects your hair and swimwear from bleaching or damage. Its highly efficient, compact design reduces the need for filter back washing, saving both water and energy.

Imagine stepping into a pool where the water feels pure, refreshing, and free from harsh chemicals. With the Bioswim Depurator, powered by advanced Actox technology, you can experience chlorine-free swimming that purifies your pool water 50 times more effectively.

Enjoy irritation-free swimming with no dry skin, red eyes, or damaged hair. This eco-friendly solution eliminates harmful chemicals and provides superior purification while being easy to install and maintain. Bioswim transforms your pool into a healthier, cleaner oasis with minimal environmental impact. Its compact design makes installation quick and hassle-free, and its advanced technology requires less maintenance.

Dive into the future of pool care with Bioswim - swim clean, swim clear, and enjoy a safer, more sustainable swimming experience.

GFRP PRODUCTS

WHAT IS GRP?

Glass Reinforced Polymer (GRP) is a composite material comprising a polymer matrix reinforced with glass fibers. It surpasses many traditional materials in terms of chemical and corrosion resistance, and its mechanical strength is well-regarded. Additionally, it is lightweight, exhibits impressive temperature resistance, provides thermal insulation, and can be molded into intricate shapes. GRP products are easily repairable and require minimal maintenance. The zero scrap value of GRP ensures it is not susceptible to theft.

GFRP REBARS

Sustainable future of Reinforcement Starts Here — GRP Rebars That Outlast and Outperform Steel.

Thanks to its Durability and Eco-Friendly Nature.

Advanced technologies like Glass Fiber Reinforced Polymer (GFRP) rebar offer an excellent alternative for non-structural applications. GFRP rebar is ideal for various non-structural projects such as flatwork and slab-on-grade applications. By utilizing GFRP rebar in these contexts, we can reduce the burden on steel resources, reserving them for essential structural needs. This approach promotes sustainability and cost efficiency in construction, ensuring that our valuable steel resources are preserved for future generations.

We stocks FiBAR® of diameters 4, 6, 8, 10, 12, 16, 20, and 25mm. We transport dia. up to 12mm in coils of 100-200m. Beyond FB-12, we transport lengths according to the container size of the vehicle, usually 6m long bars.

GFRP GUARD RAIL

GRP Rail Guards – The Smarter, Safer, Stronger Choice

Upgrade your safety standards with GRP (Glass Reinforced Plastic) Rail Guards – the next-generation solution engineered to outperform steel. Lightweight yet incredibly strong, GRP rail guards offer superior corrosion resistance, zero maintenance, and exceptional durability in even the harshest environments.

Say goodbye to rust, heavy lifting, and costly upkeep. Say hello to efficiency, longevity, and peace of mind.

- Non-corrosive & Weatherproof
- Non-conductive – Safe for Electrical Zones
- Easy to Install & Maintenance-Free
- Cost-Effective Over Lifetime
- Ideal for Industrial, Marine & Harsh Outdoor Use

Choose GRP – where innovation meets safety.

A pedestrian guard railing is often used to direct pedestrians to a preferred formal crossing point and to discourage them from making any dangerous crossing movements. It is installed on the sides or median of roads to restrict access to the carriageway, reducing conflict between motorised vehicles and pedestrians. Traditional materials used for this application are mild steel, stainless steel, and RCC. All these materials have their limitations, merits and demerits.

ELECTRICAL OHL PRODUCTS

At **ICON SERVICES & TRADES**, we offer a **comprehensive range of electrical products and custom-engineered solutions** tailored to meet the specific needs of infrastructure, utility, and industrial projects.

Whether it's for **overhead line materials, substation equipment**, or **project-specific custom-built items**, we deliver quality, reliability, and technical support at every step.

OUR PRODUCT OFFERINGS INCLUDE:

OVERHEAD LINE SOLUTIONS (LT & HT)

- Transmission & Distribution Line Hardware
- Substation Structures and Accessories
- PG Clamps, Copper Lugs, and OHL Accessories

EARTHING & GROUNDING MATERIALS

- Earth Rods & Complete Earthing Accessories

LIGHTNING PROTECTION SYSTEMS

- 11KV & 33KV Lightning Arrestors
- Available in Porcelain & Polymeric Insulation

OVERHEAD LINE SOLUTIONS (LT & HT)

- Cable Terminations & Joints
- Link Boxes, Lugs, Insulation Tapes
- Emergency Repair Kits & Laying Tools
- Smart Monitoring Systems for Power Cables

WHY CHOOSE US?

- ✓ Custom-made Solutions as per Client Drawings
- ✓ Premium Quality from Trusted Manufacturers
- ✓ Timely Delivery & End-to-End Project Support
- ✓ Compliance with International Standards

YOUR TRUSTED PARTNER FOR ELECTRICAL OVERHEAD LINE & POWER DISTRIBUTION SOLUTIONS

GEOSYNTHETIC PRODUCTS

ENGINEERED SOLUTIONS FOR GROUND STABILITY & ENVIRONMENTAL PROTECTION

YOUR TRUSTED PARTNER FOR GEOSYNTHETIC PRODUCTS

GEOTEXTILES

Non-woven & woven fabrics engineered for separation, filtration, reinforcement, and drainage in civil engineering and landscaping applications.

Applications: Roads, railways, retaining structures, erosion control

GEOGRIDS

High-tensile polymer grids designed to reinforce soil and reduce deformation under load.

Applications: Retaining walls, embankments, road foundations

SALT BARRIERS

Advanced membranes designed to protect against salt intrusion and ensure long-term durability in saline-prone environments.

Applications: Road embankments, agricultural fields, coastal protection

GEO COMPOSITES

Multi-layered products combining geotextiles, geonets, membranes, and cores for enhanced drainage and filtration.

Applications: Landfills, tunnels, roads, retaining walls

GEO CELLS

Three-dimensional honeycomb structures used for soil stabilization and load distribution.

Applications: Slope protection, load support, channel protection

GEO MEMBRANES

Impermeable liners made of HDPE, LLDPE, or PVC for high-performance containment.

Applications: Landfills, ponds, reservoirs, canals

HDPE TELECOM DUCTS

Our comprehensive range of products includes Telecom Ducts, Micro, Pressure Pipes, Liner Pipes, Duct Accessories & Fittings. These are highly recognized in the market for their unique attribute such as high strength, splendid quality and Long service life

OUR WIDE VARIETY OF DUCTS INCLUDE

SUPERLUBE

- Superlube duct is a High Density Polyethylene Duct with solid permanently lubricated inner layer.

RIBWAY

- Ribway duct is innovatively designed with straight ribs in inner layer along with super smooth lubricated layer

MEGAPACK

- Megapack is a group of ducts of same or various sizes encased in a durable, flexible oversheath depending upon the requirement of project. Megapack provide upgrade options by providing multiple fiber pathways.

EASYTRACE

- is a duct with a conductive traceable wire for easy location of duct. Easytrace duct ensures easy location of duct using industry standard locating equipment.

ROPE IN DUCT

- ducts are also available with optional Pre-Installed rope to facilitate pulling of cable.

ROREPEL DUCTS

- Rorepel ducts are non – toxic repellent which do not kill rodents but dissuade them.

LSZH

- duct have superior fire suppression properties over standard duct such as low smoke emission, zero halogen and prevent spread of fire from one area to another.

TELECOM ACCESSORIES AND TOOLS

MICRODUCT & MICROPACK

- We offers Microduct & Micropack (bundles of microducts) in various Sizes &. Micropack is a group of micro ducts of same or various sizes encased in a durable configuration, flexible oversheath. The individual microducts in the micropack are colour coded as per requirement of project. Micropack provide upgrade options by providing multiple fibre pathway

DRIP IRRIGATION PIPES

HDPE PRESSURE PIPES

HDPE LINER PIPES

VALVES

GATE VALVE

Purpose: Gate valve used for pipeline isolation purpose in oil & gas, water segment

Application: Hydro carbon, Steam, LNG, LPG, Water

Size Range: 1/2" ~ 60"

Class Rating: 150CL ~ 4500CL

Material Grade: WCB, WCC, A105, LCB, LCC, LF2, WC6, WC9, C5, C12, F11, F22, CA15, CA6NM, CF8M, CF8, CF3M, CF3 Duplex stainless steel, Super duplex stainless steel, Nickel alloys, Copper alloys.

Technical Specification:

- Wedge type design, Parallel slide design
- Extended stem design, Pressure seal bonnet design, Bolted Bonnet, Extended bonnet for cryogenic application, Gate valve with Bypass valve for high pressure service
- Motor operated valve, Flanged/buttweld end/threaded/ socket weld end
- Forged steel/Cast steel gate valve
- API600/API602/API 603/API 6A Valves

GLOBE VALVE

Purpose: Globe valve used for throttling purpose in oil & gas, water industry.

Application: Hydro carbon, Steam, LNG, LPG, Water

Size Range: 1/2" ~ 24"

Class Rating: 150CL ~ 4500CL

Material Grade: WCB, WCC, A105, LCB, LCC, LF2, WC6, WC9, C5, C12, F11, F22, CA15, CA6NM, CF8M, CF8, CF3M, CF3 Duplex stainless steel, Super duplex stainless steel, Nickel alloys, Copper alloys.

Technical Specification:

- Plug type design/Ball type design
- Pressure seal bonnet design
- Extended bonnet for cryogenic application
- Motor operated valve
- Forged steel/cast steel globe valve
- Flanged/buttweld end/threaded/socket weld end

FIBER OPTIC SOLUTIONS

We offer a comprehensive portfolio of fiber optic components designed to meet the evolving needs of telecommunication networks, data centers, sensing systems, and industrial automation.

FIBER ARRAY

- High-precision V-groove fiber alignment arrays
- Used in optical modules, PLC splitters & photonic packaging

FIBER BRAGG GRATING (FBG)

- Reflects specific wavelengths for sensing & filtering applications
- Widely used in structural health monitoring, telecom, and industrial sensing
- High stability and narrow reflection bandwidth

OPTICAL POWER SPLITTER (PLC/FBT TYPE)

- Splits optical signals evenly for PON networks
- Low insertion loss & excellent uniformity
- Available in 1×N, 2×N configurations

WAVELENGTH DIVISION MULTIPLEXER (WDM)

- Combines multiple signals on one fiber by using different wavelengths
- CWDM & DWDM solutions for increased network capacity
- High isolation and low insertion loss

FIBER OPTIC CABLE

- Full range of indoor, outdoor, aerial, duct, micro-duct & FTTH cables
- Single-mode & multi-mode options

OPTICAL DISTRIBUTION ASSEMBLY (ODF/BOXES)

- Termination, splicing, and management of fiber connections
- Rack-mounted and wall-mounted enclosures

FIBER OPTIC ACCESSORIES

- Adapters, connectors, pigtails, patch cords, attenuators & cleaning tools
- Designed for durability and high-performance connections

ROCKFALL PROTECTION

At Icon Services and Trade LLC, we proudly supply high-performance materials engineered to meet the demanding requirements of geotechnical, marine, and aquaculture projects.

ROCKFALL PROTECTION SYSTEM

Heavy-duty mesh and barriers to mitigate rockfall hazards, enhancing safety in hilly and mountainous terrain.

Various Gabion retaining walls for Geohazard Solutions:

- Rockfall protection of hill slopes / cuttings using High Strength Steel Wire Rope Net and Hexagonal Double Twisted Mesh Panel.
- Rock fall protection of hill slopes / cuttings using hybrid system comprising of high strength steel wire rope net (GSRW) and rock bolts- 300x300mm, 450x450mm, 450x600mm.
- Rock fall protection of hill slopes using Rock fall Arresters / Barriers 500kJ- 5000kJ energy.
- Avalanche Barriers

AQUAROCK BAGS

Resilient geotextile containers for scour protection and shoreline stabilization — ideal for underwater and coastal installations.

PP ROPES & DYNEEMA ROPES

High-strength ropes for marine, industrial, and offshore uses. Dyneema ropes offer exceptional tensile strength with minimal weight.

FISHING NETS & CAGES

Robust, weather-resistant aquaculture solutions, optimized for long-term use in demanding marine environments.

SPECIAL ROPES

Custom-developed rope solutions to meet unique application needs across marine and industrial sectors.

GARDEN NETS

Functional and aesthetic netting for gardens and landscaping. UV-resistant and easy to install.

EROSION CONTROL AND EMBANKMENT PROTECTION

- GARMAT® Supreme Erosion Control Mat (ECM)
- GARMATTurf Reinforcement Mat (TRM)

PREINSULATED PIPES & FITTINGS

We offer advanced pipe systems designed for the safe and efficient transport of liquids, gases, and thermal media across a wide range of applications. In partnership with globally recognized manufacturers, we provide cutting-edge preinsulated pipe solutions that ensure long-term reliability, energy efficiency, and compliance with international standards.

PREINSULATED PIPES & FITTINGS

High-performance pipe systems for district cooling, heating networks, and industrial applications — providing thermal insulation and corrosion resistance for extended service life.

PIPES FOR HOT, COLD WATER & STEAM SYSTEMS

Robust piping solutions for domestic, commercial, and industrial water and steam transport applications. Engineered for thermal efficiency and pressure durability.

CORRUGATED STAINLESS STEEL (SS)

PIPES – DOUBLE WALLED

Flexible, double-walled corrugated pipes designed to safely carry flammable or water-polluting media. Leak-proof and ideal for filling stations and chemical plants.

CORRUGATED SS PIPES – SINGLE WALLED / HELICALLY CORRUGATED

Highly flexible and easy-to-install piping systems for a wide variety of industrial media, offering excellent chemical and temperature resistance.

FUEL PIPES – PIPE-IN-PIPE SYSTEM

Innovative pipe-in-pipe systems with leak detection capabilities ensure environmental safety and operational reliability in fuel and chemical distribution.

CRYOGENIC PIPES

Specialized piping systems for ultra-low temperature applications in LNG, industrial gas, and medical sectors — maintaining insulation integrity under extreme conditions.

PIPELINE PROTECTION

We deliver advanced, field-proven **pipeline protection systems** engineered to perform under the toughest conditions. Our comprehensive range ensures **durability, safety, and compliance** across all critical pipeline infrastructure.

NEXT GENERATION PIPE PROTECTION

Innovative materials and designs that protect pipelines from corrosion, abrasion, and impact during transportation, storage, and installation. Solutions include:

- Rock shield mesh wraps
- Abrasion-resistant coatings
- Outer wrap composites

EXTREME PIPE PROTECTION

Designed for challenging environments such as rocky terrain, directional drilling, or offshore installations. Our systems ensure pipeline longevity and mechanical resilience.

- HDD (Horizontal Directional Drilling) sleeves
- Impact and wear-resistant layers
- Reinforced pipeline wraps

BUOYANCY CONTROL

Solutions to maintain pipeline stability in submerged or wet environments, preventing flotation and movement. Products include:

- Concrete weight coatings
- Bolt-on and strap-on weight systems
- Saddle-type buoyancy control

PIPELINE SUPPORT

Engineered supports that reduce stress, maintain alignment, and extend the life of pipeline systems. Ideal for aboveground, underground, and bridge-mounted pipelines.

- Pipe shoes and saddles
- Non-metallic pipeline supports
- Adjustable and modular systems

PIPELINE PROTECTION PRODUCTS

PIPELINE PROTECTION & COATING SOLUTIONS

Comprehensive Range for Corrosion Prevention and Underground Utility Safety

Icon Services and Trade LLC proudly offers premium-grade products designed to ensure the longevity, integrity, and visibility of buried pipelines and cables across the energy and infrastructure sectors.

HEAT SHRINKABLE SLEEVES

Advanced wraparound sleeves with adhesive lining for corrosion protection and insulation of pipeline weld joints. Ensures a watertight, durable bond even in harsh underground conditions.

VISCO-ELASTIC COATINGS

Self-healing, non-curing coatings for superior corrosion protection of irregular and hard-to-coat surfaces. Excellent adhesion, even on damp or minimally prepared substrates.

COLD-APPLIED TAPE

Flexible, user-friendly tapes for pipeline corrosion protection. Requires no heat, making them safe and easy to install on-site or in tight spaces.

UNDERGROUND WARNING BOARD

High-visibility safety boards used to mark and protect buried pipelines and cables. Ensures utility awareness and reduces accidental damage during excavation.

EPOXY GLASS FIBRE REINFORCED COATING FOR HDD

High-performance epoxy system reinforced with fiberglass for Horizontal Directional Drilling (HDD) applications. Offers outstanding abrasion resistance and structural strength.

HEAT SHRINKABLE TUBES

Shrinkable tubing used for electrical insulation, mechanical protection, and environmental sealing of cable joints and terminations.

APPLICATION AREAS:

Oil & Gas Pipelines | Water & Utility Networks | Electrical Cabling | HDD Crossings | Infrastructure Projects

Partner with Icon Services and Trade LLC for reliable, cost-effective protection solutions engineered to perform in the toughest conditions.

GRATINGS

Our product range includes **Electro-Forged Gratings, Grating Clamps, Stair Treads, Handrails and Cable Management Systems**, all designed for optimal performance in industrial, commercial and infrastructure applications.

ELECTROFORGED STEEL GRATINGS:

Durable & High-Performance Solutions for Industrial Applications

Electroforged steel gratings are engineered for superior strength, durability, and safety in heavy-duty industrial applications.

STEEL MANUAL GRATING:

Precision and Flexibility for Every Application

Manual gratings are meticulously crafted by hand-welding crossbars, making them ideal for customized applications where precision and flexibility are essential.

GRATING CLAMPS:

Durable and Reliable Fastening Solutions for Industrial and Commercial Applications.

CABLE MANAGEMENT SYSTEMS:

We offer an exceptionally crafted range of cable management systems and accessories.

- Perforated Cable Trays & Accessories
- Ladder-Type Cable Managements & Accessories
- Raceways/Trunking Cable Trays

Applications: Suitable for industrial plants, commercial buildings, data centers, hospitals, railways, and airports.

HANDRAIL PRODUCT RANGE:

- Galvanised MS Handrails
- Modular Handrails
